

MUHAMMAD WAHAB

SOFTWARE ENGINEER - MOBILE AND WEB APP DEVELOPER

Lahore, Pakistan | +923162068007 | m.wahab2082@gmail.com | Portfolio

PROFESSIONAL SUMMARY

Software Engineer specializing in Flutter and full-stack JavaScript development (Node.js, Express, React, Next.js), with hands-on experience shipping multiple production mobile and web applications end to end, from Firebase-backed mobile apps to REST API integrations, AI-driven automation platforms, and CI/CD deployments. Comfortable across the stack: mobile UI, backend services, relational and NoSQL databases, and multi-agent AI workflow design. Seeking to bring a builder mindset and strong fundamentals in data structures, OOP, and Agile delivery to a growing engineering team.

TECHNICAL SKILLS

- **Languages:** Dart, JavaScript, Java, C++, C
- **Mobile Development:** Flutter (cross-platform iOS and Android), state management, Firebase integration
- **Web Development:** React.js, Next.js, HTML5, CSS3, EJS, Node.js, Express.js, REST API design and integration, GSAP, React Router
- **Databases:** PostgreSQL, MySQL, MS SQL Server, MongoDB, Firebase (Firestore), Supabase
- **AI and Automation:** Multi-agent AI system design, n8n workflow automation, Ollama (local LLMs), AI-driven CRM and pricing logic
- **Tools and Practices:** Git and GitHub, CI/CD pipelines, Agile and Scrum, Docker, VS Code, Android Studio, IntelliJ IDEA, Postman
- **Core Concepts:** Data Structures and Algorithms, OOP, Database Design, Operating Systems

EXPERIENCE

Junior Mobile and Web App Developer - ZMDM IT Solutions

March 2025 - June 2026 | Remote Job

- Built and deployed multiple production mobile and web applications using Flutter, React, and Node.js, taking each project from initial architecture through client delivery.
- Set up CI/CD pipelines for the team release process, reducing manual deployment steps and shortening the path from code merge to release.
- Integrated REST APIs and third-party services, including Firebase and WhatsApp Business messaging, to extend functionality for client-facing products.
- Worked within cross-functional Agile teams, coordinating with designers and backend engineers to deliver features aligned with client requirements and deadlines.

PROJECTS

- **SWIFT Drive, Car Rental App** End-to-end car rental experience covering vehicle browsing, booking, and reservation management, delivered as a cross-platform iOS and Android app.
- **ConX Orbit, Construction AI Marketing Website** Multi-page marketing site with a brand-aligned UI, GSAP scroll storytelling, and interactive product and case-study pages on a reusable content system.
- **AI-Powered Autonomous Sales Agency** Multi-agent AI sales platform simulating a full sales team across lead generation, cold calling, pricing, CRM, and payments, with an admin dashboard and AI-controlled pricing.
- **Smart Solar App** Solar monitoring app that tracks panel performance and energy output in real time, using Firebase live data sync to keep dashboards current across iOS and Android.
- **Food Delivery App** Restaurant ordering app where users browse menus and place orders routed directly through WhatsApp, cutting friction between browsing and checkout in a single cross-platform build.
- **POS System** Point-of-sale platform with a custom dashboard for sales agents to process transactions and manage daily store operations through a clear, task-oriented interface.
- **Online Store** E-commerce platform for browsing a product catalog, adding items to cart, and completing purchases through a standalone online storefront from discovery to checkout.

EDUCATION

Bachelor of Science in Software Engineering - COMSATS University Islamabad, Lahore Campus

September 2022 - June 2026

Intermediate, Pre-Engineering (Physics, Math, Computer Science) - RYK-IBA College, Rahim Yar Khan

August 2020 - May 2022
